PLOT MIX

15 river-front villa plots, 6,540–11,205 sq ft (avg 7,942): back onto the river promenade

25 villa plots, 5,824–9,240 sq ft (avg 7,066): typical 70 × 100 ft (7,000 sq ft)

Every plot has direct frontage on a road right-of-way (checked: 0 without frontage)

ROADS

Access road 15 m from the main entry, through the resort, to the colony gate

Colony entry boulevard 24 m: 2 × 9 m carriageway + 6 m garden median

River drive and internal streets 9 m

BVN 2012 Rule 38: 9 m needed for streets up to 250 m long

DESIGN LOGIC

No gardens inside plots – a 5,000 sq ft plot has room for its own garden

River-front plots face the river across a continuous 15 m riverside promenade

Plain 9 m streets keep the most land for plots; greenery is in the river promenade

Internal streets run at an angle that fits the site, so few plots are wasted

Odd corners become pocket gardens or utility sites; clubhouse at the entry

TO CONFIRM BEFORE APPROVAL

River identity + HFL: if this is the Narmada, the 300 m rule leaves no buildable land

T&CP to accept the 15 m river buffer as part of the 10% open space

EWS/LIG: paid as shelter fee (no land) – confirm in-lieu option under 2014 rural rules

25% of developed plots mortgaged to the Collector until completion

Planning-area status and land use (T&CP); resort needs commercial use permission

Scale calibrated to surveyed areas (~1:858); architect to redraw on CAD survey
